2004	156,500	56,500	16,000	229,000	20,700	46,400	62,900	130,000	568

^{1/} A **farm** is defined as "any establishment from which \$1,000 or more of agricultural products were sold or would normally be sold during the year". Government payments are included in sales. Institutional farms, experimental and research farms, and Indian Reservations are included as farms. Places with their entire acreage enrolled in the Conservation Reserve Program, set-aside, or other government programs are considered operating farms. **Land in farms** is all land operated by farms during the year. It includes crop acreage, wasteland, woodland, pasture, land in summer fallow, idle cropland, and land enrolled in the Conservation Reserve Program and other set-aside or commodity acreage programs. It excludes public, industrial and grazing association land and nonagricultural land. It excludes all land operated by establishments not qualifying as farms.
